MATHS CORNER

1. I am an odd number. Take away one letter and I become even. What number am I?
2. Using only addition, how do you add eight 8's and get the number 1000?
3. There is a three digit number. The second digit is four times as big as the third digit, while the first digit is three less than the second digit. What is the number?

See Ms. Madu for
your answers!!!
